McD Chapter 16: The Reproductive System Ductus deferens

Female Reproductive System Skene's ducts are generally not talked about much unless a woman is being examined for gonorrhea, in which case these glands/ducts may become infected. The lower graphic illustrates 4 different types of hymens. An imperforate hymen is not shown, however, still occurs periodically.

Human Reproductive System - drcarman.info

Norm No. 19 Female breast. The female breast is a secretory organ that produces milk during lactation. Breast tissue that is not stimulated to lactate consists of resting apocrine cells arranged in nests and small ductules which are lined by cuboidal epithelium.

Duke Pathology - Week 16: Female Reproductive System

in the production of offspring. The female reproductive system produces the female reproductive cells (the eggs, or ova) and contains an organ (uterus) in which development of the fetus takes place; the male reproductive system produces the male reproductive cells (the sperm) and contains an organ (penis) that deposits the sperm within the female.
