Work, Energy & Power AP Physics B. There are many different TYPES of Energy. Energy is expressed in JOULES (J) $4.19 \text{ J} = 1 \text{ calorie}$ Energy can be expressed more specifically by using the term WORK(W) Work = The Scalar Dot Product between Force and Displacement. So that means if you apply a force on an object and it covers a ... AP Physics B ...

work on an object, because if an object is moving in a curved path, by definition the direction towards the center of curvature is always perpendicular to the direction of motion. For a force to do work, the force must have a component in the direction of displacement. So the centripetal force does no work. 3.
