The principle of power system analysis by V. k. Mehta is best of best book ever written on power system transmission and distribution. In most of the engineering universities the edition the is used for study is 4 th as it included some extra chapter than older ones. The little book contains basic information of power system.

Letters is a new section dedicated to publishing short papers addressing new ideas and opinions in Mathematical Methods in the Applied Sciences to facilitate the rapid dissemination of novel research ideas. Further information can be found in the Author Guidelines.

Mathematical Methods in the Applied Sciences - Wiley

Numerical analysis is the study of algorithms that use numerical approximation (as opposed to general symbolic manipulations) for the problems of mathematical analysis (as distinguished from discrete mathematics). Numerical analysis naturally finds application in all fields of engineering and the physical sciences, but in the 21st century also the life sciences, social sciences, medicine ...

Numerical methods for ordinary differential equations are methods used to find numerical approximations to the solutions of ordinary differential equations (ODEs). Their use is also known as "numerical integration", although this term is sometimes taken to mean the computation of integrals. Many differential equations cannot be solved using symbolic computation ("analysis").

The most common way of computing numerical derivative of a function at any point is to approximate by some polynomial in the neighborhood of .It is expected that if selected neighborhood of is sufficiently small then approximates near well and we can assume that .. Letâ€™s consider this approach in details (or go directly to the table of formulas).. At first, we sample at the (is odd ...

Hi Pavel. Nice work. Iâ€™m using it now to compute the velocity of a robot (MBARS) and your methods give very good results. Iâ€™d like to know if you have the formula of a one-sided version, as using a centered version forces me to introduce a time lag.
