

automotive technology systems approach pdf

The automotive industry uses our innovative materials and expertise to design vehicles that reduce emissions, improve fuel economy, and lower costs.

Automotive Industry | DuPont | DuPont USA

An automotive navigation system is part of the automobile controls or a third party add-on used to find direction in an automobile. It typically uses a satellite navigation device to get its position data which is then correlated to a position on a road. When directions are needed routing can be calculated. On the fly traffic information can be used to adjust the route.

Automotive 48-volt Technology

Overview. The continuing evolution of automotive technology aims to deliver even greater safety benefits and Automated Driving Systems (ADS) that “one day” can handle the whole task of driving when we don’t want to or can’t do it ourselves.

Automated Vehicles for Safety | NHTSA

The lighting system of a motor vehicle consists of lighting and signalling devices mounted or integrated to the front, rear, sides, and in some cases the top of a motor vehicle. This lights the roadway for the driver and increases the visibility of the vehicle, allowing other drivers and pedestrians to see a vehicle's presence, position, size, direction of travel, and the driver's intentions ...

Qualcomm Halo Wireless Electric Vehicle Charging (WEVC) technology was developed using a systems design approach. Our engineers generate practical solutions to technical challenges across the entire WEVC system, including power conversion, tuning, wireless power transfer, magnetics, control, communications and safety systems.
