A description of the papers and presentation documents that can be downloaded from our website follows below. All of these documents can be reproduced and distributed (to your colleagues and students) free of charge but they cannot be sold for profit.

Papers and Product Literature - Intelligen

The Journal of Food Biotechnology Research is an international, peer-reviewed open access journal dedicated to discuss the current developments and applications of modern genetics, enzymatic, metabolic and systems-based biochemical processes in food and food-related biological systems.

Journal of Food Biotechnology Research | Peer Reviewed Journal

Emphasis area at bachelor of science level in biochemical engineering. Chemical engineering is the branch of engineering which deals with changing the composition, energy content and state of aggregation of materials.

Chemical & Biochemical Engineering < Missouri University

Bioprocess Science Minor. Coordinator: Dr. Gary Scott . The bioprocess science minor gives students an understanding of the rapidly developing bioprocessing industry, which uses the chemical, physical and biological processes developed by living organisms or their cellular components in a type of advanced manufacturing of specialty commercial products.

Insertion sequence - m.blog.naver.com

Insertion element (also known as an IS, an insertion sequence element, or an IS element) is a short DNA sequence that acts as a simple transposable element. Insertion sequences have two major characteristics: they are small relative to other transposable elements (generally around 700 to 2500 bp in length) and only code for proteins implicated in the transposition activity (they are thus ...

Insertion sequence - Wikipedia

Protein precipitation is widely used in downstream processing of biological products in order to concentrate proteins and purify them from various contaminants. For example, in the biotechnology industry protein precipitation is used to eliminate contaminants commonly contained in blood. The underlying mechanism of precipitation is to alter the solvation potential of the solvent, more ...

Protein precipitation - Wikipedia

Bioengineering, an international, peer-reviewed Open Access journal. Magnesium (Mg) and its alloys can degrade gradually up to complete dissolution in the physiological environment.

Alginate: Properties and biomedical applications

International Journal of Engineering Research and Applications (IJERA) is an open access online peer reviewed international journal that publishes research ..

The manufacturing of recombinant protein is traditionally divided in two main steps: upstream (cell culture and synthesis of the target protein) and downstream (purification and formulation of the protein into a drug substance or drug product).

Perfusion mammalian cell culture for recombinant protein

ABSTRACT. Bio-process modelling is increasingly used in design, modification and troubleshooting of wastewater treatment plants (WWTPs). Characterisation of the influent wastewater to a WWTP is an important part of developing such a model.

Characterisation of wastewater for modelling of wastewater

Abstract: Environmental, economic, and safety challenges have provoked packaging scientists and producers to partially substitute petrochemical-based polymers with biodegradable ones. The general purpose of this review is to introduce polylactic acid (PLA), a compostable, biodegradable thermoplastic made from renewable sources.
