Business relationship management (BRM) is a formal approach to understanding, defining, and supporting inter-business activities related to business networking.. Business relationship management consists of knowledge, skills, and behaviors (or competencies) that foster a productive relationship between a service organization (e.g. Human Resources, Information technology, a finance department ...

### **Business relationship management - Wikipedia**

The outcome of business operations is the harvesting of value from assets owned by a business. Assets can be either physical or intangible. An example of value derived from a physical asset, like a building, is rent. An example of value derived from an intangible asset, like an idea, is a royalty. The effort involved in "harvesting" this value is what constitutes business operations cycles.
