In the social sciences and life sciences, a case study is a research method involving an up-close, in-depth, and detailed examination of a subject of study (the case), as well as its related contextual conditions.. Case studies can be produced by following a formal research method. These case studies are likely to appear in formal research venues, as journals and professional conferences ...

Case study - Wikipedia

Most managers accept that employers benefit from a diverse workforce, but the notion can be hard to prove or quantify, especially when it comes to measuring how diversity affects a firm's ability to innovate. But new research provides compelling evidence that diversity unlocks innovation and drives market growth—a finding that should intensify efforts to ensure [a]

An SSOT is the source from which multiple versions of the truth are developed. MVOTs result from the business-specific transformation of data into information—data imbued with relevance and purpose.

What's Your Data Strategy? - Harvard Business Review

In recent years, the Business History Conference has sprouted several interest groups that have coalesced around perceived needs. The first two, "Women in Business History" and "Business Historians at Business Schools," meet informally over lunch at the annual meeting to discuss issues in the profession and to network. The "Emerging Scholars" group began informally, but its leadership now ...

The Business History Conference

The historical method comprises the techniques and guidelines by which historians use historical sources and other evidence to research and then to write history. There are various history guidelines that are commonly used by historians in their work, under the headings of external criticism, internal criticism, and synthesis.
