A wicked problem is a problem that is difficult or impossible to solve because of incomplete, contradictory, and changing requirements that are often difficult to recognize. The use of the term "wicked" here has come to denote resistance to resolution, rather than evil. Another definition is "a problem whose social complexity means that it has no determinable stopping point".

Biopower (or biopouvoir in French) is a term coined by French scholar, historian, and social theorist Michel Foucault. It relates to the practice of modern nation states and their regulation of their subjects through "an explosion of numerous and diverse techniques for achieving the subjugations of bodies and the control of populations". Foucault first used the term in his lecture courses at ...

1. Introduction. Delivering project outputs on time and on cost was the main concern for project managers in 1960 up to the 1980s (). Although the research focus has changed to other concerns, such as customer satisfaction and achieving a project's strategic objectives, a significant number of project managers still focus on the iron triangle (cost, time and scope) of performance metrics.
