Polymer electrolyte membrane (PEM) fuel cells, which convert the chemical energy stored in hydrogen fuel directly and efficiently to electrical energy with water as the only byproduct, have the potential to reduce our energy use, pollutant emissions, and dependence on fossil fuels.

A review of polymer electrolyte membrane fuel cells

The majority of these tutorials are suitable for first-year university-level General Chemistry. Some of the better ones for other levels are also listed on the page General Chemistry: Starting Points for Students.

GAMSAT Question of the Day will focus on one practice question taken from a specific GAMSAT subject each day. If there is a diagram in the explanation which does not show in your browser, just click on the part that you can see, and it will become visible.

GAMSAT Question of the Day: GAMSAT Practice Questions

Thermoelectric materials show the thermoelectric effect in a strong or convenient form.. The thermoelectric effect refers to phenomena by which either a temperature difference creates an electric potential or an electric potential creates a temperature difference. These phenomena are known more specifically as the Seebeck effect (converting temperature to current), Peltier effect (converting ...

At present world facing major problems of rapid growth of population and global economy due to this demand for energy consumption has been considerably increased.

Overview of nanostructured metal oxides and pure nickel

Zolpidem, sold under the brand name Ambien, among others, is a medication primarily used for the short term treatment of sleeping problems. Guidelines recommend that it be used only after counseling and behavioral changes have been tried. It decreases the time to sleep onset by about 15 minutes and at larger doses helps people stay asleep longer. It is taken by mouth and is available in ...
