Enactivism argues that cognition arises through a dynamic interaction between an acting organism and its environment. It claims that our environment is one which we selectively create through our capacities to interact with the world. " Organisms do not passively receive information from their environments, which they then translate into internal representations.

Enactivism - Wikipedia

Interpersonal Communication is "The complex process through which people produce, interpret, and coordinate messages to create shared meanings, achieve social goals, manage their personal identities, and carry out their relationships" (Verderber, 2016). This is the everyday communication we engage in with our friends, loved ones, work colleagues, or others we encounter.
