

communication protocol specification and pdf

In modern protocol design, protocols are layered to form a protocol stack. Layering is a design principle which divides the protocol design task into smaller steps, each of which accomplishes a specific part, interacting with the other parts of the protocol only in a small number of well-defined ways.

Extensible Messaging and Presence Protocol (XMPP): Core Abstract. The Extensible Messaging and Presence Protocol (XMPP) is an application profile of the Extensible Markup Language (XML) that enables the near-real-time exchange of structured yet extensible data between any two or more network entities.

Extensible Messaging and Presence Protocol (XMPP): Core

The Push API enables sending of a push message to a webapp via a push service. An application server can send a push message at any time, even when a webapp or user agent is inactive. The push service ensures reliable and efficient delivery to the user agent. Push messages are delivered to a Service Worker that runs in the origin of the webapp, which can use the information in the message to ...
