MODBUS APPLICATION PROTOCOL SPECIFICATION V1

For advanced users desiring to develop their own custom software applications for communicating with Garmin® GPS products, this document describes the communication protocols required for transferring data including waypoints, routes, and track logs to and from Garmin GPS products via RS-232 or USB.

Garmin: Device Interface SDK

In telecommunication and data transmission, serial communication is the process of sending data one bit at a time, sequentially, over a communication channel or computer bus. This is in contrast to parallel communication, where several bits are sent as a whole, on a link with several parallel channels.. Serial communication is used for all long-haul communication and most computer networks ...
