The literature on trade and production networks is at an early stage, and there are a large number of unanswered empirical and theoretical questions. You may purchase this paper on-line in .pdf format from SSRN.com (\$5) for electronic delivery.

## **Networks and Trade - nber.org**

Trade involves the transfer of goods or services from one person or entity to another, often in exchange for money. A system or network that allows trade is called a market. An early form of trade, barter, saw the direct exchange of goods and services for other goods and services.

## **Trade - Wikipedia**

transportation services are provided within a network (or system), what happens in one place affects what happens in another. Therefore, the appropriate methodology has to take into account not only the spatial relations as the goods and people are shipped between two points, but also how these shipments fit into a network (or system).
