These animations are from the examples/ASPHERE sub-directory of the LAMMPS distribution and are described in examples/ASPHERE/README. They are animations of the various kinds of aspherical models LAMMPS supports, namely point ellipsoids, rigid bodies, and generalized aspherical particles made of line/triangle facets in 2d/3d.

In computational physics, N-body simulations (also called N-particle simulations) are simulations of dynamical

systems of particles under the influence of certain conditions, such as being subject to gravity. These simulations are very common in cosmology and computational fluid dynamics.. N refers to the number of particles considered. As simulations with higher N are more computationally ...
