I think Modern Compiler Implementation in ML is the best introductory compiler writing text. There's a Java version and a C version too, either of which might be more accessible given your languages background. The book packs a lot of useful basic material (scanning and parsing, semantic analysis, activation records, instruction selection, RISC and x86 native code generation) and various ...

I corroborate everything Marc said about the skies over Tucson yesterday, 4/26/18. And, the day before, 4/25/18, the sky was "clear" for much of the day; in the early afternoon the lines started to appear, and by late afternoon it was the same artificial cloud cover that always appears after this activity.
