WAY AHEAD IN CORROSION CONTROL. To overcome the corrosion problems inherent to a developing energy industry, Deepwater engineers draw from decades of offshore corrosion engineering and design experience.

Deepwater Corrosion Services Inc.

Stress corrosion cracking (SCC) is the growth of crack formation in a corrosive environment. It can lead to unexpected sudden failure of normally ductile metals subjected to a tensile stress, especially at elevated temperature. SCC is highly chemically specific in that certain alloys are likely to undergo SCC only when exposed to a small number of chemical environments.

Federal Register /Vol. 79, No. 181/Thursday, September 18

Pipeline transport is the long-distance transportation of a liquid or gas through a system of pipesâ€”a pipelineâ€”typically to a market area for consumption. The latest data from 2014 gives a total of slightly less than 2,175,000 miles (3,500,000 km) of pipeline in 120 countries of the world. The United States had 65%, Russia had 8%, and Canada had 3%, thus 75% of all pipeline were in these ...

Foreword ii This report, Oil Pipeline Characteristics and Risk Factors: Illustrations from the Decade of Construction, provides a description of the technologies, materials and construction practices and their evolution over time, including a discussion of the physical properties of steel. It describes and analyzes the safety performance of today's nationwide oil pipeline system as a function of

Oil Pipeline Characteristics and Risk Factors

Course Overview: Corrosion is a disease to materials just like a disease to human beings. Some types or forms of corrosion can be prevented through good practices in materials selection and design, while others can be cured or controlled if diagnosed early.
