A junk head is a form of piston engine cylinder head, where the head is formed by a dummy piston mounted
inside the top of the cylinder. In most other engine designs, the cylinder head is mounted on top of the
cylinder block. That form has also been termed a "poultice head". It is obviously essential for any piston engine
to seal the joint between block and head.

Junk head - Wikipedia

A head gasket is a gasket that sits between the engine block and cylinder head(s) in an internal combustion
engine.. Its purpose is to seal the cylinders to ensure maximum compression and avoid leakage of coolant or
engine oil into the cylinders; as such, it is the most critical sealing application in any engine, and, as part of
the combustion chamber, it shares the same strength requirements ...

Stitching Pin Selection
 Most aluminum cyl heads have fairly thin walls so you should use L4 pins that have very fine threads.
 The fine threads also work well when tapping into the hard seat insert.
 L4 pins will fit in between the seats in most cases.
 Larger diameter pins are used when the casting is thicker.
