Blue is one of the three primary colours of pigments in painting and traditional colour theory, as well as in the RGB colour model. It lies between violet and green on the spectrum of visible light. The eye perceives blue when observing light with a dominant wavelength between approximately 450 and 495 nanometres. Most blues contain a slight mixture of other colors; azure contains some green ...

So many legends, so little time. Rick Grefe has asked me to speak briefly on the value of continuity in our profession. Of course one could take that charge to mean the short history of design, perhaps beginning with Peter Behrens, who is credited with invention of identity programs and coordinating graphic and industrial design activities.
