In databases, change data capture (CDC) is a set of software design patterns used to determine (and track) the data that has changed so that action can be taken using the changed data.

### **Change data capture - Wikipedia**

1. Introduction. A data warehouse (DW) is a collection of technologies aimed at enabling the decision maker to make better and faster decisions. Data warehouses differ from operational databases in that they are subject oriented, integrated, time variant, non volatile, summarized, larger, not normalized, and perform OLAP.
