

design portal frame buildings pdf

Green building (also known as green construction or sustainable building) refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle: from planning to design, construction, operation, maintenance, renovation, and demolition. This requires close cooperation of the contractor, the architects, the ...

Green building - Wikipedia

With over 500,000 users downloading 3 million documents per month, the WBDG is the only web-based portal providing government and industry practitioners with one-stop access to current information on a wide range of building-related guidance, criteria and technology from a 'whole buildings' perspective.

WBDG | WBDG - Whole Building Design Guide

Single storey buildings are usually required to provide large open floor areas, with few internal structural columns, thus offering maximum flexibility in use and freedom for activities that involve moving plant and equipment inside the building. These requirements are most often achieved by using a relatively light structural frame spanning from one side of the building to the other, clad ...

Single storey industrial buildings - Steelconstruction.info

The design and construction of skyscrapers involves creating safe, habitable spaces in very high buildings. The buildings must support their weight, resist wind and earthquakes, and protect occupants from fire. Yet they must also be conveniently accessible, even on the upper floors, and provide utilities and a comfortable climate for the occupants.
