

### **down syndrome pdf**

These guidelines are designed to assist the pediatrician in caring for the child in whom a diagnosis of Down syndrome has been confirmed by chromosome analysis. Although a pediatrician's initial contact with the child is usually during infancy, occasionally the pregnant woman who has been given a prenatal diagnosis of Down syndrome will be referred for review of the condition and the genetic ...

Down syndrome (DS or DNS), also known as trisomy 21, is a genetic disorder caused by the presence of all or part of a third copy of chromosome 21. It is typically associated with physical growth delays, characteristic facial features, and mild to moderate intellectual disability. The average IQ of a young adult with Down syndrome is 50, equivalent to the mental ability of an 8 or 9-year-old ...

### **Down syndrome - Wikipedia**

Down syndrome is a condition in which a person has an extra chromosome. Chromosomes are small "packages" of genes in the body. They determine how a baby's body forms during pregnancy and how the baby's body functions as it grows in the womb and after birth. Typically, a baby is born with 46 ...

### **Developmental Scale for Children with Down Syndrome**

Down syndrome is a chromosomal abnormality characterized by the presence of an extra copy of genetic material on the 21st chromosome, either in whole (trisomy 21) or part (such as due to translocations). The effects of the extra copy varies greatly from individual to individual, depending on the extent of the extra copy, genetic background, environmental factors, and random chance.

It breaks my heart that for every 1 of these little Noah's that you see, there's 9 other Noah's you don't see. 9 out of 10 children who are known to have Down syndrome through prenatal testing are aborted. These children are never given a shot at life. Never given a chance. So many families are told a lie. The lie is that you have to be afraid of the results of a Down syndrome screening test.

Prenatal testing for Down syndrome provides a recalculation of the possibility that a pregnancy is positive for Down syndrome. But, odds are that almost every pregnant woman will not give birth to a child with Down syndrome and this holds true for even most pregnancies positive for Down syndrome. Down syndrome pregnancies naturally miscarry most of the time.
