Causality (also referred to as causation, or cause and effect) is what connects one process (the cause) with another process or state (the effect), [citation needed] where the first is partly responsible for the second, and the second is partly dependent on the first. In general, a process has many causes, which are said to be causal factors for it, and all lie in its past (more precise: none ...

The gut microbiota is a complex microbial ecosystem, and maintaining a mutualistic relationship with it is critical for human health (). A notable example of such a relationship is the production of short-chain fatty acids (SCFAs) through bacterial fermentation of carbohydrates: The human host diet provides nondigestible

carbohydrates to support bacterial growth, and in return, the bacteria ...
