

experimentation validation and uncertainty pdf

Validated Learning. Progress in manufacturing is measured by the production of high quality goods. The unit of progress for Lean Startups is validated learning-a rigorous method for demonstrating progress when one is embedded in the soil of extreme uncertainty.

The Lean Startup | Methodology

Uncertainty is a situation which involves imperfect or unknown information.It applies to predictions of future events, to physical measurements that are already made, or to the unknown.

Uncertainty - Wikipedia

Yisong Yue is an assistant professor in the Computing and Mathematical Sciences Department at the California Institute of Technology. His research interests lie primarily in the theory and application of statistical machine learning.

Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.
