Lakes ranked by maximum depth. This list contains all lakes whose maximum depth is reliably known to exceed 400 metres (1,300 ft) Geologically, the Caspian Sea, like the Black and Mediterranean seas, is a remnant of the ancient Tethys Ocean. The deepest area is oceanic rather than continental crust.

List of lakes by depth - Wikipedia

Many cyanobacteria form motile filaments of cells, called hormogonia, that travel away from the main biomass to bud and form new colonies elsewhere. The cells in a hormogonium are often thinner than in the vegetative state, and the cells on either end of the motile chain may be tapered.

1. Introduction. VÅ™rÅ™smarty et al. (2000) urged the international â€œwater sciences communityâ€• to work together in the collation and dissemination of hydrological data and modelling techniques to improve our understanding of freshwater ecosystems and â€œsecure a more complete picture of future water vulnerabilitiesâ€•. Lakes, in particular, are highly valued ecosystems as they provide ...

Histoire sémantique du concept d'eutrophisation. Au contraire d'un milieu oligotrophe (mot désignant un milieu naturellement pauvre en éléments nutritifs), un milieu est dit eutrophe quand il est naturellement riche en éléments nutritifs, sans que cela interfère négativement avec ses fonctions écosystémiques et les services écosystémiques fournis par le milieu.

Eutrophisation à Wikipedia

New Books on Managing soil health for sustainable agriculture: There has been growing concern that both intensive agriculture in the developed world and rapid expansion of crop cultivation in developing countries is damaging the health of the soils, which are the foundation of farming.
