Kitchen exhaust cleaning (often referred to as hood cleaning) is the process of removing grease that has accumulated inside the ducts, hoods, fans and vents of exhaust systems of commercial kitchens. Left uncleaned, kitchen exhaust systems eventually accumulate enough grease to become extreme fire hazards. Exhaust systems must be inspected regularly, at intervals consistent with usage, to ...

Kitchen exhaust cleaning - Wikipedia

Vibration isolation is the process of isolating an object, such as a piece of equipment, from the source of vibrations.. Vibration is undesirable in many domains, primarily engineered systems and habitable spaces, and methods have been developed to prevent the transfer of vibration to such systems.

Quote HSE " Success in managing major Hazards is not measured by the Occupational Health and Safety Statistics but by measuring the performance of critical systems used to control risks to ensure they are operating as intended.. This statement is a very powerful statement and i want to stand on the premise that it should form the basis of assessing and formulating regulation regimes.

Topic 9: Safety and risk management in oil and gas

In order to provide our customers with high quality, cost-efficient solutions in the competitive railway market, we aim to work with our strategic partners in development and delivery from the earliest design phase through to execution in the market.
