DSX Sophistication Simplified

Data integration involves combining data residing in different sources and providing users with a unified view of them. This process becomes significant in a variety of situations, which include both commercial (such as when two similar companies need to merge their databases) and scientific (combining research results from different bioinformatics repositories, for example) domains.

Data integration - Wikipedia

Enterprise integration is a technical field of enterprise architecture, which focused on the study of topics such as system interconnection, electronic data interchange, product data exchange and distributed computing environments.. It is a concept in enterprise engineering to provide the right information at the right place and at the right time and thereby enable communication between people ...
