Cost versus ease of use The much greater computational power offered by floating-point DSPs is normally the critical element in the fixed- or floating-point design decision.

Comparing Fixed- and Floating-Point DSPs

An internal combustion engine (ICE) is a heat engine where the combustion of a fuel occurs with an oxidizer (usually air) in a combustion chamber that is an integral part of the working fluid flow circuit. In an internal combustion engine, the expansion of the high-temperature and high-pressure gases produced by combustion applies direct force to some component of the engine.

A full authority digital engine (or electronics) control (FADEC) is a system consisting of a digital computer, called an "electronic engine controller" (EEC) or "engine control unit" (ECU), and its related accessories that control all aspects of aircraft engine performance. FADECs have been produced for both piston engines and jet engines.

FADEC - Wikipedia

having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product or system in the current product catalog.
