

### introduction to real analysis pdf

Chapter 1 is concerned with the real number system. Section 1.1 begins with a brief discussion of the axioms for a complete ordered field, but no attempt is made to develop the reals from them; rather, it is assumed that the student is familiar with the consequences of these axioms, except for one: completeness.

I often teach the MATH 501-502: Introduction to Real Analysis course at the University of Louisville. The course is intended for a mix of mostly upper-level mathematics majors with a smattering of other students from mathematics, physics and engineering. These are notes I've compiled over the years. They cover the basic ideas of analysis on the real line.

Course Description: This is the first of two required courses on analysis for Math majors. It is to be followed by Math 301 (Real Analysis). This course will focus on the proofs of basic theorems of analysis, as appeared in one variable calculus. Along the way to establish the proofs, many new concepts will be introduced. These include
