Information Technology Questions and Answers - Sanfoundry

Get Started scripting language. A scripting language is a form of programming language that is usually interpreted rather than compiled. Scripting languages are typically converted into machine code on the fly during runtime by a program called an interpreter.

.Net development information and Visual Basic / VB

Staging area is place where you hold temporary tables on data warehouse server. Staging tables are connected to work area or fact tables. We basically need staging area to hold the data , and perform data cleansing and merging , before loading the data into warehouse.

What is a staging area? Do we need it? What is the purpose

What is ANTLR? ANTLR is a parser generator, a tool that helps you to create parsers. A parser takes a piece of text and transforms it in an organized structure, such as an Abstract Syntax Tree (AST). You can think of the AST as a story describing the content of the code, or also as its logical representation, created by putting together the various pieces.
