The common raven (*Corvus corax*), also known as the northern raven, is a large all-black passerine bird. Found across the Northern Hemisphere, it is the most widely distributed of all corvids. There are at least eight subspecies with little variation in appearance, although recent research has demonstrated significant genetic differences among populations from various regions.

So many factors are already far past the breaking point, major links in the chain of our current reality are likely to fall soon. Though the collapse of the paradigm we have formerly known is inevitable and near, the collective efforts of the already awakened could still positively alter the composition of what is unfolding.
