One of the principal means by which state management of rapid economic development has been attempted in the Greater Mekong Subregion (GMS) has been the creation and maintenance of special economic zones (SEZs). The purpose of SEZs is to encourage domestic and international investment in specific areas to promote mainly export-oriented manufacturing.

Monitoring the health of the greater Mekongâ€™s rivers The methods used for biomonitoring can be sophisticated, producing highly accurate results, but can also be simplified for communities to use. In countries where budgets for biomonitoring are low, using community-based biomonitoring systems can effectively and cheaply tell us about a riverâ€™s health.
