Objectivity in science is a value that informs how science is practiced and how scientific truths are discovered. It is the idea that scientists, in attempting to uncover truths about the natural world, must aspire to eliminate personal biases, a priori commitments, emotional involvement, etc. Objectivity is often attributed to the property of scientific measurement, as the accuracy of a ...

Ego death is a "complete loss of subjective self-identity". The term is used in various intertwined contexts, with related meanings. In Jungian psychology, the synonymous term psychic death is used, which refers to a fundamental transformation of the psyche. In death and rebirth mythology, ego death is a phase of self-surrender and transition, as described by Joseph Campbell in his research on ...
