In mathematics, a group is an algebraic structure consisting of a set of elements equipped with a binary operation which combines any two elements to form a third element. To be a group, this operation must satisfy four conditions called the group axioms, namely closure, associativity, identity and invertibility. One of the most familiar examples of a group is the set of integers together with ...

Introductory Proviso: The following essay on possible gun confiscation is a purely conjectural gedankenexperiment about the future that extrapolates from recent history and current trends. Nothing herein is seditious (per 18 U.S. Code § 2384), nor a call to arms, nor a threat to our government or to any individual, agency, or group.

In mathematics, monstrous moonshine, or moonshine theory, is the unexpected connection between the monster group M and modular functions, in particular, the j function. The term was coined by John Conway and Simon P. Norton in 1979.. It is now known that lying behind monstrous moonshine is a vertex operator algebra called the moonshine module (or monster vertex algebra) constructed by Igor ...

I've seen analyses of the long odds the U.S. government would face if it ever attempted to confiscate civilian firearms before. The Mathematics of Countering Tyranny seems like a particularly well done example.. The authors compute that under very generous assumptions there are about 83000 door-knockers available to perform confiscation raids.
