Note: The point of this approach is it lets you to build a formula where the sheet name is a dynamic variable. So, for example, you could change a sheet name (perhaps with a drop down menu) and pull in information from different worksheet.

Excel formula: Dynamic worksheet reference | Exceljet
John knows how to create a copy of a worksheet, but he needs to create a copy that uses only static values, not values based on formulas. He wonders if there is a quick way to make a copy (perhaps with a macro) that maintains all formatting and column widths, but has all formulas replaced with their results.

Creating a Copy without Formulas (Microsoft Excel)
Chemistry of Natural Substances â€“ Organic Chemistry Worksheets 1 Worksheets for Organic Chemistry Worksheet 1 Alkanes Question 1. Provide IUPAC names for the following structures

Worksheets for Organic Chemistry - cffet.net
A spreadsheet is an interactive computer application for organization, analysis and storage of data in tabular form. Spreadsheets developed as computerized analogs of paper accounting worksheets. The program operates on data entered in cells of a table. Each cell may contain either numeric or text data, or the results of formulas that automatically calculate and display a value based on the ...
