National Geographic stories take you on a journey thatâ€™s always enlightening, often surprising, and unfailingly fascinating.

National Geographic Magazine

Origins. Synapsida, a clade that contains mammals and their extinct relatives, originated during the Pennsylvanian subperiod (~323 million to ~300 million years ago), when they split from reptilian and avian lineages.

Mammal - Wikipedia

The largest prehistoric organisms include both vertebrate and invertebrate species. Many are described below, along with their typical range of size (for the general dates of extinction, see the link to each).
