The production of renewable energy in Scotland is an issue that has come to the fore in technical, economic, and political terms during the opening years of the 21st century. The natural resource base for renewable energy is extraordinary by European, and even global standards, with the most important potential sources being wind, wave, and tide.. In 2015, Scotland generated 59% of its ...

Renewable energy is energy that is collected from renewable resources, which are naturally replenished on a human timescale, such as sunlight, wind, rain, tides, waves, and geothermal heat. Renewable energy often provides energy in four important areas: electricity generation, air and water heating/cooling, transportation, and rural (off-grid) energy services.

I. Policy Framework - One of the cornerstones of Arizona's™ current energy policy is the REST. This policy has helped spur a thriving renewable energy industry here in the state. Using the REST's™ policy framework as the foundation for modernizing the state's™ energy policy, the REST will now be renamed the Clean Resource Energy Standard and Tariff (CREST).
