Introduction to Offshore Pipelines and Risers

Offshore aquaculture, also known as open ocean aquaculture, is an emerging approach to mariculture or marine farming where fish farms are moved some distance offshore. The farms are positioned in deeper and less sheltered waters, where ocean currents are stronger than they are inshore. One of the concerns with inshore aquaculture is that discarded nutrients and feces can settle below the farm ...

Breakwaters reduce the intensity of wave action in inshore waters and thereby reduce coastal erosion or provide safe harbourage. Breakwaters may also be small structures designed to protect a gently sloping beach and placed one to three hundred feet offshore in relatively shallow water.. An anchorage is only safe if ships anchored there are protected from the force of high winds and powerful ...
