A square root of a number x is a number r which, when squared, becomes x : $r^2 = x$. Every positive real number has two square roots, one positive and one negative. For example, the two square roots of 25 are 5 and -5 . The positive square root is also known as the principal square root, and is denoted with a radical sign: \sqrt{x} . Since the square of every real number is a positive real number, negative ...
