More number of patients with dementia are linked to expanding population aged 65 and over – One out of approx. seven people aged 65 and over suffer dementia.

Nursing for the older people in Japan

What is Long-Term Care? Individuals need long-term care when a chronic condition, trauma, or illness limits their ability to carry out basic self-care tasks, called activities of daily living (ADLs), (such as bathing, dressing or eating), or instrumental activities of daily living (IADLs) (such as household chores, meal preparation, or managing money).

Health, as defined by the World Health Organization (WHO), is "a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity." This definition has been subject to controversy, as it may have limited value for implementation. Health may be defined as the ability to adapt

and manage physical, mental and social challenges throughout life.

Health - Wikipedia

Our review findings have not identified conclusive evidence of benefit of HCW vaccination programmes on specific outcomes of laboratory-proven influenza, its complications (lower respiratory tract infection, hospitalisation or death due to lower respiratory tract illness), or all cause mortality in people over the age of 60 who live in care institutions.

Influenza vaccination for healthcare workers who care for
