

physical diagnosis of pain pdf

Pain is a distressing feeling often caused by intense or damaging stimuli. The International Association for the Study of Pain's widely used definition defines pain as "an unpleasant sensory and emotional experience associated with actual or potential tissue damage, or described in terms of such damage"; however, due to it being a complex, subjective phenomenon, defining pain has been a challenge.

Pain syndromes are common in MS. In one study, 55% of people with MS had clinically significant pain at some time, and almost half had chronic pain.

Pain : National Multiple Sclerosis Society

Medical diagnosis (abbreviated Dx or D S) is the process of determining which disease or condition explains a person's symptoms and signs. It is most often referred to as diagnosis with the medical context being implicit. The information required for diagnosis is typically collected from a history and physical examination of the person seeking medical care. . Often, one or more diagnostic ...

The McKenzie Method Background: Robin McKenzie developed the method in the late 50s. In 1981 he launched the concept which he called Mechanical Diagnosis and Therapy (MDT) - a system encompassing assessment (evaluation), diagnosis and treatment for the spine and extremities. Most low back pain is "mechanical" in origin, meaning that an applied
