Software I'm a passionate R user as well as developer and maintainer of several R packages. All the code is available in my github repositories.. plspm provides a toolkit exclusively dedicated to Partial Least Squares Path Modeling (PLS-PM) analysis.; plsdepot a set of tools for performing Partial Least Squares (PLS) analysis of one or two data tables.

Partial least squares regression (PLS regression) is a statistical method that bears some relation to principal components regression; instead of finding hyperplanes of maximum variance between the response and independent variables, it finds a linear regression model by projecting the predicted variables and the observable variables to a new space. . Because both the X and Y data are ...

Well, that's how you run a path analysis by hand. I do not think anyone would do this in a publication any more but it is a good practice for students to better understand structural part of the SEM.

Anyone know about Path Analysis? Can SPSS perform it? Any

PLS-regression (PLSR) is the PLS approach in its simplest, and in chemistry and technology, most used form (two-block predictive PLS). PLSR is a method for relating two data matrices, X and Y, by a linear multivariate model, but goes beyond traditional regression in that it models also the structure of X and Y. PLSR derives its usefulness from its ability to analyze data with many, noisy ...

HURRICANE UPDATE: Sadly, the venue we had chosen for our Winter Stats Camp in Puerto Rico is unable to host us and we must postpone the event to January of 2019. The meeting space sustained damage that needs repairs. Unfortunately, the demand for repairs on the island is too great and the hotel will not be able to hold meetings until later in the spring when they are hopefully able to get ...

There are few things more complicated in analytics (all analytics, big data and huge data!) than multi-channel attribution modeling. We have fought valiant battles, paid expensive consultants, purchased a crazy amount of software, and achieved an implementation high that is quickly, followed by a " gosh darn it where is my return on investment from all this?"

Cloud computing has become the buzzword in the industry today. Though, it is not an entirely new concept but in today's digital age, it has become ubiquitous due to the proliferation of Internet, broadband, mobile devices, better bandwidth and mobility requirements for end-users (be it consumers, SMEs or enterprises).

The usage and adoption of cloud computing by small and

As far as the BER for BPSK in OFDM with Rayleigh Multipath Channel is concerned, I think I have no doubt on it, since as the result shows BPSK using OFDM with Rayleigh Multipath channel has the same performance as the BPSK(Single carrier) with a Rayleigh flat channel thanks to the characteristic of OFDM using CP.
