With over 500,000 users downloading 3 million documents per month, the WBDG is the only web-based portal providing government and industry practitioners with one-stop access to current information on a wide range of building-related guidance, criteria and technology from a 'whole buildings' perspective.

### **WBDG | WBDG - Whole Building Design Guide**

A gas cylinder or tank is a pressure vessel for storage and containment of gases at above atmospheric pressure. High-pressure gas cylinders are also called bottles. Inside the cylinder the stored contents may be in a state of compressed gas, vapor over liquid, supercritical fluid, or dissolved in a substrate material, depending on the physical characteristics of the contents.

### **Gas cylinder - Wikipedia**

The vertical growth of a tank or vessel is handled easily as shown. The advantage of pressure balancing is that the vessel is not subjected to an unbalanced side load from the pressure thrust at the nozzle.

### **PRESSURE BALANCING EXAMPLES - US Bellows**

3 Selecting the right tool when faced with many choices can be overwhelming. The following series of questions may help in getting focused on the characteristics that differentiate the designs.

FRP (Fibreglass Reinforced Plastics, also known as GRP, or Glass Reinforced Plastics) is a modern composite material of construction for chemical plant equipment like tanks and vessels. Chemical equipment that range in size from less than a metre to 20 metres are fabricated using FRP as material of construction.. FRP Chemical Equipments are manufactured mainly by Hand Lay-up and filament ...
