PDFCreator is an application for  
converting documents into  
Portable Document Format (PDF)  
format on Microsoft Windows  
operating systems. It works by  
creating a virtual printer that  
prints to PDF files, and thereby  
allows practically any application  
to create PDF files by choosing to  
print from within the application  
and then printing to the  
PDFCreator printer. Wed, 16
