Many modern European states trace their roots back to a period known as the Migration Period that spans from Late Antiquity to the early Middle Ages. We have conducted the first population-level analysis of people from this era, generating genomic data from 41 graves from archaeological sites in present-day Bavaria in southern Germany mostly dating to around 500 AD.

The occurrence of the warming of the Earth and other planets of the Solar System is science based on observed natural phenomena made in the last century. The Climate Variability and the Global Warming are natural phenomena. As a scientist, I am obliged to catalogue like pseudoscience and dogmatism the attribution to the human beings of a 100% natural phenomenon.
