

process dynamics modeling and pdf

This is the key issue in Process Dynamics. It is also why Process Dynamics is the usual precursor to a study of Process Control. To assist in this study of process dynamics, it is important to have some sort of quantitative assessment of process behavior; this is usually in the form of a mathematical model.

Process dynamics In a dynamic system, the values of the variables change with time, and in this chapter we quantify the well-known fact that "things take time." We also consider dynamic modeling, dynamic responses (analysis), dynamic simulation (numerical calculation) and process control. 11.1 Introduction
