INTRODUCTION. Intensive care units (ICUs) are environments for hospitalization of patients in critical health conditions requiring specialized and continuous care (). Therefore, nursing support in ICUs requires quick and accurate identification of individual health conditions by nurses because of patients’ severity and instability and complexity of the required care.

Psychological resilience is the ability to successfully cope with a crisis and to return to pre-crisis status quickly. Resilience exist when the person uses "mental processes and behaviors in promoting personal assets and protecting an individual from the potential negative effects of stressors". In simpler terms, psychological resilience exists in people who develop psychological and ...

An interpersonal relationship is a strong, deep, or close association or acquaintance between two or more people that may range in duration from brief to enduring. This association may be based on inference, love, solidarity, regular business interactions, or some other type of social commitment. Interpersonal relationships are formed in the context of social, cultural and other influences.
