Hands-On Astronomy Activities Â« Astronomical Society

The history of science is the study of the development of science and scientific knowledge, including both the natural and social sciences. (The history of the arts and humanities is termed history of scholarship.) Science is a body of empirical, theoretical, and practical knowledge about the natural world, produced by scientists who emphasize the observation, explanation, and prediction of ...

Inquiry-based learning is at the core of the Exploratorium. We invite people to ask questions, question answers, and discover for themselves how the world works.

Exploratorium: The Museum of Science, Art and Human

X-ray astronomy is an observational branch of astronomy which deals with the study of X-ray observation and detection from astronomical objects. X-radiation is absorbed by the Earth's atmosphere, so instruments to detect X-rays must be taken to high altitude by balloons, sounding rockets, and satellites. X-ray astronomy is the space science related to a type of space telescope that can see ...

Discovery Education ignites student curiosity and inspires educators to reimagine learning with award-winning digital content and professional development. Accelerate student achievement by capturing the minds and imaginations of students. Visit us online and learn more!

Discovery Education - Digital Textbooks and Educational

Speed is the distance traveled divided by the time of travel. For example; if you were to travel a distance of 10 miles in 2 hours time, then your average speed equals 5 miles per hour. $s=d/t$ (s =speed, d =distance, t =time, and the / means to divide). The word velocity is very similar to speed (except velocity also has a direction called a vector) and in most cases we will now use the letter "v ...
