Programming Language Concepts (Undergraduate Topics in Computer Science) [Peter Sestoft] on Amazon.com. *FREE* shipping on qualifying offers. Programming Language Concepts uses a functional programming language (F#) as the metalanguage in which to present all concepts and examples

Programming Language Concepts (Undergraduate Topics in

In computer science, imperative programming is a programming paradigm that uses statements that change a program's state. In much the same way that the imperative mood in natural languages expresses commands, an imperative program consists of commands for the computer to perform. Imperative programming focuses on describing how a program operates.. The term is often used in contrast to ...

Imperative programming - Wikipedia

A programming language is a formal language which comprises a set of instructions used to produce various kinds of output. Programming languages are used to create programs that implement specific algorithms.. Most programming languages consist of instructions for computers, although there are programmable machines that use a limited set of specific instructions, rather than the general ...

Geschichte. Die 1957 entwickelte Programmiersprache Fortran implementiert wie die zuvor verwendeten Assemblersprachen das imperative Paradigma. LISP, 1958 erschienen, ist ein Beispiel für eine deklarative Sprache, bei der der Computer selbst einen Handlungsablauf zur Berechnung konstruieren muss.. Literatur. Terrence W. Pratt, Marvin V. Zelkowitz: Programming Languages: Design and Implementation.
