Microfabrication is the process of fabricating miniature structures of micrometre scales and smaller. Historically, the earliest microfabrication processes were used for integrated circuit fabrication, also known as "semiconductor manufacturing" or "semiconductor device fabrication". In the last two decades microelectromechanical systems (MEMS), microsystems (European usage), micromachines ...

We present a brief overview of negative bias temperature instability (NBTI) commonly observed for in p-channel metal-oxide-semiconductor field-effect transistors (MOSFETs) when stressed with negative gate voltages at elevated temperatures and discuss the results of such stress on device and circuit performance and review interface traps and oxide charges, their origin, present ...
