

solution of integral calculus pdf

The ancient period introduced some of the ideas that led to integral calculus, but does not seem to have developed these ideas in a rigorous and systematic way. Calculations of volume and area, one goal of integral calculus, can be found in the Egyptian Moscow papyrus (13th dynasty, c. 1820 BC), but the formulas are simple instructions, with no indication as to method, and some of them lack ...

Calculus - Wikipedia

In mathematics, an integral assigns numbers to functions in a way that can describe displacement, area, volume, and other concepts that arise by combining infinitesimal data. Integration is one of the two main operations of calculus, with its inverse operation, differentiation, being the other. Given a function f of a real variable x and an interval $[a, b]$ of the real line, the definite integral

Figure 43.2 Note that the function is periodic of period 2. Solution. Since $f(t)$ is periodic; we have $\int_0^s f(t) e^{-st} dt = \int_0^1 f(t) e^{-st} dt + \int_1^{s+1} f(t) e^{-st} dt + \dots$ But the integral on the right is convergent for $s > 0$ so that the integral on the left is convergent
